

## **KERA-COAT ON GOING PROJECTS**

1. SOUR SERVICES – Hydrogen embrittlement

2. STRONG ALCALIS – Caustic Services

3. METAL DUSTING

Kera-Coat has solutions at 570°C (1060°F)

Project; increase Temperature Resistance to 800°C (1475°F)

4. COKE DEPOSITIONS

5. CEMENT

Kera-Coat has solutions (See [Downloads / Others / Stainless Steel castings at high temperature and abrasion in a cement clinker cooler](#) for more info) for Cement

Industry:

- Project; increase Temperature and Abrasion/Erosion Resistance in coolers and heat recovery
- Flue gas condensation,
- Waste heat recovery,
- Condensed water neutralization
- Dust wet filtering in the fume condenser

***A world of extreme environments to be explored!!***
